Universal 4-channel multi-frequency transmitter EGO (from 433,92 MHz to 868,35MHz)

EGO

**Duplicating the original transmitters has never been so easy!
A shell of new design, linear, light and intuitive contains a
jewel of technology.**

The **EGO transmitter** is suitable to unify or replace all
outproduction radio commands plus the ability to replace almost
all the models currently trading.

EGO is able to emulate a large part of the transmitters. The
frequency spectrum reproduced in self-learning range from 433
MHz to 868 MHz (excluding quartz frequencies ranging from
28.785 MHz to 40.600 MHz).

In addition to the frequency, **EGO** is able to recognize the
encoding type present in the original (if fixed code or rolling code)
and replicate it precisely and constantly.

You can store up to 4 transmitters with different frequencies and
codes (one for each button).

CODE GENERATOR FEATURE

If the original transmitter is not available or damaged EGO is provided internally with the codes from the models described in the instructions.

HOW DOES IT WORK

After entering in the programming mode, press as many times as required in the key where you want to store the original code.

See example:

The table in the instructions

marca A	N2
marca B	N5
marca C	N6

To add the code of "BRAND A" in the EGO transmitter, press N2 times the button that you want to store (see the first row in the table). For "BRAND B" instead, press it N5 times (see the second row in the table).

NEW

version
EGO32

Both versions, **EGO / EGO32** can copy all fixed codes from 433,92 to 868,35 MHz. The algorithms of rolling codes that are not stored in EGO, are added to EGO 32. Check the user manual on our website to discover which EGO fits your needs.
