

## Photocells and safety devices/ Spiral cable

NEW

# SPK

**SPK spiral cables** are made from high-quality materials, making them suitable for the most intensive installations. The extension factor is four times the block length (BL). Spiral cables are resistant to microbes, hydrolysis and almost all mineral oils, thanks to a special sheath compound.

In addition, spiral cables are UV-stable and halogen-free.

The material is black PUR/PUR, the colour of the wires complies with DIN 47100:

3 wires = brown, white, green

4 wires = brown, white, green, yellow

5 wires = brown, white, green, yellow, grey

6 wires = brown, white, green, yellow, grey, pink

Variable cable ends (see table), including 40, 50, 60, 80, 100 or 200 mm without sheath and equipped with cable lugs (AEH).

Designation	Spiral length	Total cable length	Length end extremity 1 (AE1)	Length end extremity 2 (AE2)	code
<b>3 wires</b>
